ARISE SCHOLARSHIP FUND

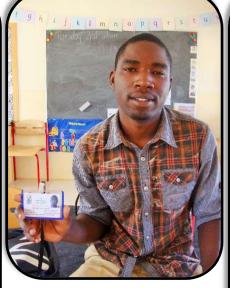

How you can support...

Did you know?

On average it costs between £600 and £1600 per year to fund a college student in Zambia. This includes course fees, accommodation, travel, books and equipment.

The most common type of employment for our Arise guardians is piece work (occasional manual labour) which earns about £1.50 a day.

Unsurprisingly, this means that affording the costs of a two or three-year college course is simply impossible.

The Arise Scholarship Fund

We are setting up a scholarship fund to enable some local young people who have been supported by Arise through school, to achieve their dream of attending college.

Once those who have been supported by Arise reach college age, they will be eligible to apply for an Arise scholarship.

They will be expected to complete an application form with details of what and where they wish to study, attend an Arise panel interview to discuss their suitability and commitment, and contribute a portion of the fees which is determined by their personal circumstances.

All monies donated to the scholarship fund will be put into a pot and the number of college students that Arise can support will be determined by the donations that are received. The money will be used towards course fees, accommodation, transport, books and equipment.

How you can help...

We welcome one-off donations or more regular giving to enable some of the local young people to attend college. Any amount that you can give is appreciated and will make a massive difference in the lives of the students and the local communities.

For more information on giving to the scholarship fund, please email us at arise@kaniki.dk.

If you are a UK taxpayer and would be happy for us to claim Gift Aid, please email us and we will send you a form to complete.

Every year we will send a newsletter to everyone who has contributed to the scholarship fund with details of how the money has been used and some of the students who have been supported.
